

Integrated Financial Solution

About Us

Ciobera Information Technology is committed to providing advanced, secure and cost-effective IT solutions to its customers. It is mainly focused on the financial industry where it develops tailor made IT solutions for investment institutions and brokerage houses. It is one of the very few IT solutions company which under one roof is capable to offer its clients a host of custom made back office solutions to address their growing business requirements. Built on latest, scalable technology, it is designed to support all departments within the organization.

A Comprehensive, Functionally Rich, Integrated Wealth Management Solution

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

In today's complex marketplace, where the degree of uncertainty is greater and the global economic outlook remains highly uncertain, traditional investment methodology and investment risk tolerance assumptions are greatly challenged. Asset managers, portfolio administrators, financial system managers are expected to be proactive, increase proficiency while managing the customer's investments.

We at Ciobera realize the need for preemptive asset management, financial planning and have developed comprehensive solutions that are scalable, cost effective, improves efficiency and meets the needs and strategic goals of our customers. Our FYNISYS wealth management system is a cloud based, integrated cross-asset solution providing the best-in-class functionality for each product class while eliminating the cost of installing and maintaining individual on-premise systems.
